ANCHOR TYPE ROTO SEAL

TECHNICAL INFORMATION

- A patented, rotor-lock seal ideal for sealing small-diameter apertures on water, gas, and electricity meters, taximeters, tanker valves, etc.
- Features a large, customizable marking area on the seal; this area can be produced in a color contrasting with the seal body.
- Available with transparent or opaque body options.
- Requires no special tools for sealing or removal.
- Can be supplied pre-assembled with a plastic-coated, 7-strand steel cable or in roll form.
- Serves as an alternative to lead seals and plastic indicator seals.
- Available in polycarbonate (PC) and ABS material options to suit various outdoor applications.
- UV-resistant and suitable for outdoor use.
